>>> REPLICATION INSTRUCTIONS

This folder contains data information and all source code used to generate tables and results for the paper "Improving Child Health and Cognition: Evidence from a School-Based Nutrition Intervention in India". All files ending in .do should be executed in Stata (version 15.0 or higher) and all files ending in .r should be executed in R.

The replication material provided here allow for the Main Tables as well as Appendix Figures and Tables to be generated. The appendix tables or figures are prefixed by A. The data needed to replicate these tables/figures are proprietary data and can be requested from the corresponding author, Prof. Santosh Kumar, at skumar@shsu.edu.
